

The Plants

The following plants have been initially selected as candidates for further breeding and study as part of the COHA-ACHO research project *Integrated techniques for efficient breeding, production and transplant survival of unique ornamental species*.

Lobelia cardinalis
Cardinal Flower

Lobelia siphilitica
Great blue lobelia

Helenium autumnale
Sneezeweed

Physostegia virginiana
False dragonhead / Obedient plant

Allium cernuum
Nodding onion

Penstemon hirsutus
Hairy Beardtongue

Monarda fistulosa
Wild bergamot

Monarda punctata
Spotted bee balm

Amsonia tabernaemontana
Eastern Bluestar

Aquilegia canadensis
Eastern red columbine
